Hi Ned,

Just want circle back to you about the contacts with NRDA, CDFW, and anyone else that is doing sampling in the area. If you could forward their contact information, that would be great.

Also, I did enjoy our talk last week, and I'd like to have a follow-up conversation to learn more about your involvement with the spill and other aspects of your work. How does your schedule look over the next couple weeks for a brief phone-call?

Thanks again,

Alex

Hi Ned,

Thanks again for your call. As I mentioned, our work involves assessing contamination and other impacts from oil operations and we are very interested in the sampling efforts related to the oil spill near Refugio. It would be great to talk with some of the other groups that are collecting samples (e.g., tissue, water, sediment) and testing for organics, and (if possible) see any data.

At your earliest convenience, would you send the contact information of anyone you think I should speak with about current and future monitoring in the area?

Best,

Alex
